

Marking

Your FY2 wishes to discuss 4 patients with you who they would like to send home

Washed hands	
Confirms identity of doctor	
Listens to junior doctor	
Case 1 – well asthmatic <ul style="list-style-type: none"> • Asks about observation • Asks about Peak flow • Ask about treatment received including steroids • Asks to check inhaler technique 	
Case 2 – bilateral renal pain in 70 year old left in waiting room <ul style="list-style-type: none"> • Shows concern that this may be AAA • Asks about observations • Suggest move patient to resus • Suggests senior doctor needs to review patient ASAP • Suggests needs AAA ultrasounds scan 	
Case 3 – 3 year old with non-blanching rash <ul style="list-style-type: none"> • Asks about observations • Asks about distribution of rash • States a senior doctor should review as concern regarding meningitis 	
Case 4 – 16 year old – eaten humous and now is making loud sounds – <ul style="list-style-type: none"> • Expresses concern regarding airway compromise • Asks about treatment given • Asks for patient to be moved to resus • Explains that adrenalin must be given IM • States to move to resus 	
Asks if doctor has any questions	
Suggests reading material particularly on anaphylaxis	
Delicately avoids completing CBD – as doctor only just started in ED	
Asks about who supervisor is	
Thanks doctor
